Importing CAD libraries Zeramex XT

How to import the library into your exocad system?

1. Close your exocad software
2. Unzip the folder "zeramex_xt_exocad_v1.zip"
3. Move the unzipped folder to the following installation directory of the exocad software: \DentalCADApp\library\implant
4. Lunch your exocad software
5. You have successfully installed the Zeramex XT Zerabase library.

Information: Zeramex XT exocad Model Creator will be available soon.

How to import the library into your 3Shape system?

1. Open the 3Shape Dental System Control Panel
2. Tools ▶ Import/Export ▶ Import material
3. Select "zeramex_xt_3shape_v5.dme". Save and close the "3Shape Dental System Control Panel".
4. You have successfully installed the Zeramex XT Zerabase library.

Please **contact the support service of your CAD/CAM provider with any questions** on software data import.

Order the parts necessary for treatment directly with Zeramex.
